

# Alderley

## Environmental Policy

**Alderley Systems environmental policy is an integral part of the company's business strategy and the responsibility for managing and maintaining it lies with the Board of Directors.**

**We are an environmentally conscious and responsible company committed to the management of potential and actual environmental impacts resulting from our activities.**

**Our aim is for continual improvement to ensure that all aspects of the business have the least harmful effect on the environment by allocating sufficient resources and implementing an environmental management system to:**

- **Develop and improve environmentally sound processes and techniques using up to date products and services paying particular attention to waste minimisation, re-use and re-cycling, non polluting technology, reduction of power consumption and control of by products being released to the environment.**
- **Cover all aspects of our business including procurement, manufacturing, development, testing and transport of our goods and services.**
- **Be fully aware of all environmental legislation and ensure that regulatory requirements are met by adopting best practices.**
- **Encourage all employees through communication and training programmes to be fully committed to and act in accordance with our environmental goals and targets.**
- **Monitor the implementation of the policy by carrying out periodic audits and set targets for continuous improvement.**
